

Nine Lives: Not Allowed In the Classroom

Under what conditions is it appropriate to remove a student? Ignore the student if they are playing “lose-lose” or “chips on the shoulder” and the class can still function. But if a student is playing either of the above and the class CANNOT function, remove them.

Describe a student in your class (past or present) who played lose/lose. Describe what methods you used to manage before realizing the student was playing lose/lose.

How did you know the student was playing lose/lose? What behavior was present? Was the class able to function? Did you remove the student? Were you able to ignore?

Describe a student in your class (past or present) who played chips on shoulder. Describe what methods you used to manage before realizing the student was playing chips.

How did you know the student was playing chips? What behavior was present? Was the class able to function? Did you remove the student? Were you able to ignore?
